## **DETAILED ACTION**

### ***Election/Restrictions***

Claims 8, 10 and 11 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 5.

Applicant's election with traverse of Group I (Claims 1-7 and 9) in Paper No. 5 is acknowledged. The traversal is on the ground(s) that all of the claims 1-11 (Groups I, II, III and IV) are directed to a focusing method for a zoom lens and that there would not be a serious burden to the Patent Office to examine all claims. This is not found persuasive because the structures specifically called for in the different Groups have a specific classification based on structure that would not have overlapping searches. For example, the search for the negative first lens group and positive second lens group structure of claim 8 (Group II) would not overlap with the search for a positive, negative, positive structure of Group I.

The requirement is still deemed proper and is therefore made FINAL.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 2873

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 9 is rejected under 35 U.S.C. 102(b) as being anticipated by Imai. Imai teaches a zoom lens having a positive first lens group, a negative second lens group and a positive third lens group in this order from an object (see Fig. 3). The second lens group is a focusing lens group in a predetermined discrete focal length range (A) and the third lens group is a focusing lens group in another predetermined discrete focal length range (B) (see col. 4, lines 24-28).

***Allowable Subject Matter***

Claims 1-7 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitations of the independent claims, in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented, for example, in independent claim 1, which include a focusing method for a zoom lens having the recited transverse magnification and the different focusing lens groups depending on the predetermined discrete focal length range.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
